## **PRESS RELEASE**

### **FOR IMMEDIATE RELEASE**

September 21, 2025

### **East Providence Department of Public Works – Water Utilities Division to begin Unidirectional Water Pipe Flushing Program**

- When:** Fall 2025 (Scheduled to commence September 29, 2025).
- Where:** From Narragansett Park Dr to Newman Ave and from Don Ave to Roger Williams Ave and surrounding areas.
- What:** Flushing or cleaning in water distribution systems is the process of expelling water through fire hydrants to remove sediments that may have built up over time.
- Why:** Hydrant flushing is performed within water distributions systems on semi-annual basis to remove sediment build-up and thereby improve the water quality. Customers in flushing may experience discolored water and lower than normal water pressure. Allow your cold water to run for a short time to clear lines. We apologize for any inconvenience this may cause you.

Crews will perform flushing during normal business and evening hours.
