

FOOD WASTE PREVENTION PRESENTATION

TUESDAY, JULY 8
11:00AM

In this presentation from the RI Resource Recovery Company (RIRRC), you will learn how food waste occurs, the impact of wasted food, and simple tools that have been shown to be effective in reducing household food waste.

From an impact standpoint, preventing household food waste has the double benefit of decreasing the amount of food waste going to the landfill (where it produces methane, a potent greenhouse gas) as well as saving households' money by preventing edible food from going to waste!
